

## Reflection on The 6th Next-Generation Global Workshop

RAMEEZ Aboobacker, National University of Singapore

The organizing the conference was excellent. Everything was quite efficient. The workshop theme is broad and relates to with my current work as well.

Questions and Answers sessions followed by the overall comments given by a professor was the most useful. The organizer may distribute the booklet of the full-paper proceedings of the presenters at the registration. Many include the emails of the presenters in the contact details or abstracts of the proceedings.
