

[General Exchange Student]

[Hwang Seon Gu, School of Economics]

[01/10/2013~31/03/2014]

(a) Although my 2nd major is business administration, I am not good at economics. So, I want to get familiar with economics by attending courses in Kyoto University. However, I think I still don't get familiar with economics. Shamefully, I doubt I can get credit of the courses after the exam. But in Japanese, I have got a better at Japanese by using Japanese actually. I think I become more accurate in speaking Japanese than before. In addition, I have broaden my horizons by living in foreign countries and interacting with people from many countries. I think I become a better person than before. I think I had a good experience.

(b) It was difficult to get used to lecture courses because system of lecture in Kyoto University is different from my home university. But, the 4 months passed and I think I have get used to system of lecture in Kyoto University. Besides studies, I join the Acappella circle. My hobby is going to karaoke. So, I want to begin doing activities related to singing. I am pleased to have an experience singing in front of people.

(c) Introduction to Management-This class is intended for learning the basics of business administration. Based on such basic text, and provides a sketch knowledge and the underlying for an overview of the underlying concepts in helping to understand the management of the company, to think, point of view, and framework. Organizational Behavior 2- In this lecture, the perspective like this, in particular, through be analyzed diversified, sense of belonging to the enterprise of our country workers, to understand about human psychology in the organization. In addition, in to capture the sense of belonging, it is going to go in addition to also discussed mental health and motivation, morale. Business Development- It discusses the major changes for corporate management, how the current enterprise is configured. And consider the meaning of human history manner that it has. Special Lecture on Financial System in Japan-In this lecture, for the financial system, give a lecture with a focus on the particular function. On I saw the outline of the Japanese financial system, funds separate channels indirect financing, financial markets, market-oriented indirect financing, such as public finance. Special Lecture on Innovation Policy- In this lecture, by which to understand through case various something to do with innovation, to consider why each case whether was able to transition to the stage of research, development, commercialization, industrialization, and social order to fruition innovation to reveal the terms and conditions of.

(d) I like Japanese. So, I majored in Japanese. And I want to get a job that use Japanese in the future. I believe that experience in Kyoto University does good to it in any shape or form.
